In Brief

I am an engineer and researcher specializing in signal processing and artificial intelligence, as well as a Python developer. In academia, my focus has been on deep learning, learning theory, image and video compression, and inverse problems. Additionally, I am Co-Founder of Radiobooks, a startup that assists independent authors and self-learners in automatically converting their books into audio-books using AI. Through this venture, I am gaining knowledge in product development and Python DevOps.

Highlights:

- [7 publications](#) with over 300 citations in top-tier venues, and 3 patents.
- Contributed to the development of [pioneering methods](#) in neural compression.
- Crafted [novel algorithms](#) for learning the activation functions of a neural network.
- Created the "[Deep Splines](#)" PyTorch package.
- Co-Founded [Radiobooks](#)—a startup that makes AI text-to-speech technology.
- Built the [back-end](#) of a complex text-to-speech app.

Please note that I will be attending a course in philosophy and meditation at the Tergar Institute in Nepal between mid-September and mid-December in both 2024 and 2025. As a result, I will be available to work from now until the beginning of the course and then again three months later.
